# Backward Incline Clips

## Standard

The white zinc coated Backward Incline Balancing Clips come in a range of weights from 0.05 grams up to 56.0 grams.

The Backward Incline balancing clips (RIC) are designed for use on flat blades. The symmetrical legs each have a lead and barb to hold them in place and allow for easy application. They can be applied with either side as top and can also be used on curved blades if the blade radius does not interfere with the barb grip.

Our RIC clips are available in a white zinc finish or black phosphate coating.

These are available in convenient packs of 25 (2RIC) and 100 (1RIC). We also offer a Full Set of 1100 clips which contains 100 of each weight ranging from 0.05 grams up to the 56.0 gram clips as well in bulk orders. Volume pricing is available for 1,000 clips or more

# Backward Incline Clips

Extra Wide Black

The Extra Wide Black Backward Incline Clip is an answer to our customers' request for a smaller clip with superior gripping power for a thicker fan blade. Perfect for tighter areas where you need a little more weight in a smaller clip, but still need a wider throat to accommodate a thicker blade. Three sets of barbs ensure this clip will stay put even when opened to approximately 3 mm or .125 inches. Available only in black phosphate finish.
